

Perimeter Forest GP Inc. & Perimeter Forest Limited Partnership Forest Management Policy

Perimeter Forest GP Inc. and Perimeter Forest Limited Partnership is committed to Sustainable Forest Management on lands owned by the company

Principles

- We shall maintain sustainable forest management and commit to monitoring, reviewing, reporting, and modifying forest management practices leading to continual improvement in sustainable forestry.
- We shall strive to meet or exceed the requirements of all applicable legislation, regulation, and other goals and objectives specific to lands under management.
- We shall ensure the sustainability of identified timber and non-timber values through development and maintenance of long-term plans and the implementation of those plans which respect timber harvesting practices and the promotion and conservation of habitat and ecosystem integrity.
- We shall ensure the regeneration of all forest lands under ownership through either natural means or planting of acceptable seedlings in accordance with approved management plans.
- We shall implement measures that protect our forests from damaging agents such as fires, pests, disease, and invasive or exotic plants and animals through appropriate management techniques to maintain and improve long-term forest health and productivity.
- We shall encourage input from employees, contractors, and the public in identifying sustainable forestry issues and address those concerns in a timely fashion.
- We shall promote sustainable forestry awareness on forestry issues amongst employees, contractors, and the general public.
- We shall promote and support the expansion of forest knowledge, through forestry research, science and technology, and apply this knowledge when economically, environmentally, and socially beneficial and as viable.
- We shall promote sustainable forestry practices among other forest landowners.
- We shall identify, map, and respect unique areas of historical, cultural, geological, or ecological value.
- We shall use, conform, and promote Best Management Practices (BMPs) in planning and implementation of all operations, in particular, with regards to protecting and maintaining soil productivity, the protection of water bodies and riparian zones, maximizing wood utilization, consideration of recreational potential, and improving the visual quality of the forest operations.
- We shall comply with social laws covering employment equality, anti-discrimination, and anti-harassment (and International Labour Organization core conventions not covered by Canadian Law) while respecting indigenous peoples' rights, ensuring workers a safe and healthy workplace and access to information in a timely fashion.
- We shall have a process to regularly review which stakeholders and First Nation communities are affected by forest management activities.

Perimeter Forest

- We shall respect the legal, customary, and traditional rights of First Nations as outlined in treaties, provincial, and federal laws and the UN Declaration of the Rights of indigenous peoples.
